

# What's the Value of a Landline?

## THESE CORDS MAY NOT LOOK LIKE MUCH...

...They may  
save your life.

*Wireless phone service is convenient, easy, and portable. But you still need a landline. There are many reasons why you should keep your landline telephone.*

- ♦ More accurate 911 locating services.  
Phone calls can be traced back to a landline telephone.
- ♦ Telephone access during power outages.  
VoIP (Voice over Internet Protocol) most likely will not work during a blizzard or other outage. Be sure to have a non-cordless phone in your home.
- ♦ Consistent coverage - service is always available.  
Landline phones work no matter where you are in your house - upstairs, downstairs, or in an interior room.
- ♦ Make and receive collect calls.
- ♦ Unlimited Local Calling.  
The time spent on the phone calling locally does not count against a certain number of minutes allotted per month or billing cycle.
- ♦ Clarity, reliability and quality.
